

NAC SETAC 24TH ANNUAL MEETING AND SHORT COURSE

CALL FOR ABSTRACTS

Please join us for the 24TH NAC SETAC Annual Meeting and Short Course on May 21 through 23, 2018 at the University of New Hampshire Durham Campus Conference Center.

We are now accepting abstracts for platform and poster presentations. Session topics this year include:

- Sediments
- Climate Change
- Risk Assessment
- Emerging Contaminants
- Toxicology
- Sustainability and the Environment

Something else that's relevant? We encourage you to submit abstracts for either platform or poster presentations outside of these general topics for consideration! Abstracts may be submitted at:

nacsetac.org

Abstracts are due by May 1, 2018

We are pleased to announce this year's keynote speaker, David R. Vallee, Hydrologist-in-Charge of NOAA/NWS Northeast River Forecast Center:

Examining Climate Trends in the Northeast and their Impacts on Riverine and Coastal Flood Behavior

Short Course

This year's short course will be on creating effective graphics for data visualization and science communication. More details to come!

Student Rates and Awards

As always, we will be offering reduced registration rates and travel awards for student presenters. Visit our website for more information!
